

Information regarding the extent to which vacant pitches on existing Gypsy and Traveller sites can accommodate the outstanding requirement.

The three sites in East Northamptonshire have planning consent for a maximum number of caravans rather than pitches. The table below details the total number of authorised caravans and provides information gathered for the traveller caravan counts undertaken at the sites during January and July 2022 on the number of caravans counted and the number of vacancies.

	Authorised number of caravans	Number of caravans counted	Number of vacancies
January 2022	72	60	12
July 2022	72	58	14

The vacancies are for one caravan per space rather than a pitch which is defined in the GTAA as an area of land on a site/development generally home to one household which can vary in size and have varying caravan numbers.
